

Obsessing over the smallest details is an enormous part of who we are—and a huge benefit for our clients.

OUR MARKETS

- » Refining
- » Petrochemical
- » Chemical
- » Gas
- » Power
- » Fertilizer

OUR SERVICES

REFINERY MARKET

- » FCCU and Coker Turnarounds and Revamps

PETROCHEMICAL MARKET

- » Ammonia Plant Shutdowns and Revamps

POWER PLANT MARKET

- » Outages

SPECIALIZED MECHANICAL SERVICES

- » Welding Services & ASME Code Welding
- » Heater and Boiler Repairs
- » NOx and SOx System Installations
- » Pipe and Vessel Fabrication

PROJECT MANAGEMENT

- » Planning, Management, and Execution of Turnarounds
- » Constructability Reviews
- » Lift Engineering & Rigging Studies
- » CAD-CAM Modeling
- » Project Planning, Cost Control, and Management
- » Consulting Services

General Capabilities

AltairStrickland

AltairStrickland has been executing turnarounds, revamps, and upgrades for the refining, petrochemical, chemical, ammonia, and power industries since 1976. As mechanical construction specialists, our core business is focused on fluid catalytic cracking units (FCCUs), delayed coking units (DCUs), and ammonia units.

We are capable of handling the entire scope of a project, including engineering, procurement, and project management, as well as cost control and constructability reviews. 75%+ of our clients are repeat customers—a testament to our goal of achieving the highest value for our customers.

A Legacy of Innovation

For 40+ years, we've spearheaded sensible, efficient solutions for virtually every type of turnaround challenge imaginable. From pre-planning problem solving, to on-the-job, real-time innovations, it's hard to imagine a situation we can't handle.

Solution-Focused Approach

The AltairStrickland approach is unique and comprehensive. We perform project studies and analyses along with lift engineering and rigging studies that provide a precise road-map—from engineering drawings to fabrication to field assembly to start-up. Our solutions-focused approach helps eliminate problems, delays, and budget overruns.

Pre-Planning for Success

Since our founding, we have helped our customers eliminate obstacles and costly delays by participating in the early planning stages of their projects to review the construction process from start to finish—what's known as a constructability review.

As one of the few mechanical contractors to address constructability issues from the onset of a project, we're prepared by having the necessary tools and equipment reserved and ready for just-in-time service—helping ensure our clients stay on schedule and on budget.

24/7 Commitment to Safety

At Altair, safety receives top down commitment and support, from our dedicated full-time safety staff, to site specific programs, to daily pre-shift safety meetings, we have an unwavering commitment to the well-being of our customers and employees.

We are dedicated to industrial safety solutions and programs and are proud to say we've won numerous safety awards. We attribute our successful safety record in part to the Tenants of Safety, which are ingrained in every person we employ. For over forty years, we've built upon our foundation of safety, relying on our program investments and safe work practices as the cornerstone of the AltairStrickland organization.
